Mr William Daly and NRG,
Re: Insulated Concrete Block

Dear Mr. Daly,
Please accept our thanks for your NRG block product. The US Postal Service has recently completed construction of 2 facilities where your product was specified and used. The facilities, both located in New Jersey, are a critical part of our infrastructure and delivery operation. Having a product that enabled the contractor to stay ahead of the anticipated schedule was a great surprise and a great benefit to opening on time. The NRG product made the initial strages of the project extremely efficient by not requiring multiple trades. Additionally, the energy efficiency of the facility has exceeded projection thus lowering operating costs. I thank you again for the product, the customer support you provided and we loiook forward to utilizing your product in the future. I would highly recommend the use of NRG. Once again, please accept our thanks.

Sincerely,
Sid Schlomann
